

Portable Navigation for Chevrolet Spark

Especially for your Chevrolet Spark:

The new A-Pillar Garmin 4,3" widescreen advanced navigation system.

Pitty, no standard navigation sytem was build in to your Spark, but you can't do without the indispensable convenience of it. So now what? Disturbing wires throughout your new Spark and an ugly suction cup on your windscreen?

No need, since Chevrolet introduces its new A-Pillar Garmin 4,3" widescreen advanced navigation system

This 4.3" widescreen advanced navigation system, with lane assist is specially made for the current Chevrolet Spark.

This new Chevrolet Spark Portable System combines the advantages of an integrated navigation system and a portable navigation system:

•Because the navigation device can be placed in the A-Pillar, the navigation battery is loaded automatically, eliminating the need for separate disturbing cables to work with.

•The Chevrolet Spark Portable System includes a Bluetooth® car kit making a hands-free phone call possible.

•The navigation device can always be removed from the A-Pillar, so you always can use the navigation device in a 2nd car.

This Chevrolet Spark Portable System will be delivered with an additional universal backpack so that it can be used directly.

The Chevrolet Spark Portable System is based on a Garmin nüvi.
